

User Manual Forever Vital supplements

- ✓ Forever Vital supplements contain natural ingredients of the highest quality designation possible. For some supplements, they mimic the body's natural chemical processes to stimulate subsequent processes necessary to either produce energy, activate certain (dormant) processes and or accelerate the renewal of damaged cells.
- ✓ For all supplements, no artificial substances are added, such as colouring, flavouring, preservatives and or any technical additives. Most supplements are flavourless, which is very nice for use with children and animals. There are a few exception. Although we make every effort to keep the taste as neutral as possible, some supplements do not escape their natural flavour. If this is an issue; either dilute with filtered water or take it with a juice.
- ✓ Forever Vital supplements are in principle made to be used immediately. After opening it has a limited shelf life. Store in a cool (constant temperature) and dry place.
- ✓ Always shake the bottle before use, to mix the ingredients & activate the frequencies and take as directed on the website and or as indicated in the Forever Vital plan of action. Intake suggestions are always indicative. Stay sensitive to what works best for your body. Adjust if necessary.

Attention: Two oxygenating supplements pH Balance and SoLi Energizing Oxy (SEO) are so concentrated that they should *always be dissolved in distilled water first*, and do keep out of reach of children.

To your best possible vitality.
