

What we see in the blood since 2020

Since the activation of the 5G network in the world, we have seen the following vitality-undermining complaints:

1. Cell damage in young & old, 2. Increase in toxins in the head, 3. Distress of muscles and joints & weakening bone density, 4. Decrease in the vitality of the nervous system and brain (balance & coordination) and 5. impairment of the core of the human being causing a decline in concentration & focus, easily distracted & loss of short-term memory (poor recall)

Situation of vitality seen in the Vital Blood Scan BEFORE 2020:

Vital blood is red and has a clear fibrin network

Some toxins in the head

Vital bones & joints

Beginning weakened vitality of the brain and nervous system

"Round 5th drop" indicates man lives from his core: concentrated & focused

Situation vitality AFTER 2020 to date:

Vitality affected by cell damage EMF radiation, 'polluted' fibrin network & inflammation

Increase in toxins in the head

Weakened vitality of bones & joints

Impaired vitality brain & nervous system such as Parkinson

Lacking core: confused, easily distracted, lack of concentration & focus

From more than 30 years of practical experience, we have learned that if we could address the 2 main causes namely: 1. toxins (especially body foreign substances) and 2. lack of 'building blocks' to repair the resulting cell damage, our self-organizing and self-regulating body would restore vitality. This is the basis of any theme package as the answer to current vitality undermining complaints since 2020 to date.

Each theme package therefore includes: '[The Golden Duo](#)', for activating the brain and removing the 'hardening' of the cell membrane so that nutrition and waste products can be exchanged again. With the unique: [SoLi Vitamin C Xtra](#) supplying the necessary 'building blocks' and with [Deep Cleanse Energy Boost](#) you cleanse at the cellular level so that body processes are reactivated and energy can be produced to restore and build vitality. The theme packages are tailored to practical experience and are therefore general. For a more personal approach, consider the [Vital Blood Scan](#).
