

HATCHCOM USB CABLE INSTALLATION INSTRUCTIONS

Hardware Installation

1. If performing an upgrade, open PC case and remove the BlueHeat/BlueStorm card, the PTA633 Hatchcom PCI adapter assembly, and their cables.
2. Install the PTA633 card into provided enclosure as shown in the figure using two machine screws. Note: mount card on bottom part of enclosure which has the two screw holes on rear side.

3. Attach the PTA703 Hatchcom USB cable on 15 pin connector of PTA633 card.
4. If necessary replace correct blade adapter on power supply. By default the North America blade is installed. Adapters for Europe, United Kingdom, Australia, and China are included. Plug power supply into 100-240 Volt outlet.
5. Turn on the PC and wait for boot to complete. Insert the two USB cables into available USB ports on rear side of PC. Windows Vista and later should automatically detect the cables and install the drivers.

Software Installation

Insert the Hatchcom CD into CD-ROM drive to start the installer program. Follow procedure given in Appendix A of the manual.

If Hatchcom is already installed, select “Hatchcom Update” when prompted for setup type, otherwise continue procedure as per the manual.
