

Circuit Board Replacement Program

Have circuit boards replaced more quickly!

Traditionally, customers with a failed circuit board sent the board to Jamesway for repair. Now, they no longer have to. Thanks to the Board Replacement Program, they get an entirely new board at a reduced price. And they get it more quickly than during the repair program.

Why is this program better?

- The replacement board is brand new - not repaired.
- The board price is 60% less than a new board.
- A one year warranty is included.
- Delivery time is greatly reduced - compared to our previous Repaired Board Program.

The process is simple

1. Write down the board part number and serial number from the defective circuit board.
2. Provide this information to Jamesway.
3. Jamesway will send you out a new board - right away!
