

Hazard Recognition – Is the systematic observation and identification of unsafe conditions, at-risk behaviors and underlying management system weaknesses that if permitted to continue may lead to employee injury or illness.

- To have adequate knowledge of potential hazards in our work environment
- Provides an element of a comprehensive approach to safety & health
- To make workers aware of their role & responsibility for the safety of themselves, each other, in order to empower everyone to reduce the number and severity of accidents

MAY SAFETY CAMPAIGN!! RECOGNIZING HAZARDS

2021

Intent

1. **Intended to Change employees overall work behavior**
2. **Designed to Stimulate Safety Awareness**
3. **Identifies and addresses hazards related to performing a task**
4. **Identifies and addresses unsafe behaviors before an incident occurs**
