Biography

Welcome to this Web Page / PDF (My **BIO**)! My name is **Peter Arnold**, from Canada. We have ALL witnessed many CRISES recently [IRAN! UKRAINE - POLITICS! - WAR! - INFLATION - ECONOMY - CLIMATE / GLOBAL WARMING]. We're living in very "unsettled" times - with many of us wishing for far more peace & security / better health & finances / greater happiness in our lives.

BACKGROUND - I have been a Business & Financial Consultant for many years - 'specializing' mostly with Healthcare Professionals and Entrepreneurs in Canada and the US. Also I am a 'strong' Natural Health & Wellness Advocate - knowing that our HEALTH is our most "precious ASSET" on planet earth - bar none.

Before I give more "info" below … I would ask … WHY should you TRUST me … since you don't "know" me at all? In a small effort to gain some of your trust, and confidence … may I have your permission to at least, share with you … some very KIND WORDS … from a mix of a few clients? >>>>> Click HERE.

Three (3) PASSIONS - MY (3) most critical passions have centered around - HEALTH Freedom **+** TIME Freedom **+** FINANCIAL Freedom. But sadly - there seems to be a "mass MIS-understanding" - about all **3**. So, over the years, within my own professional practice - and from my own deep research, and testing … I have developed what "I" believe to be some solid information & sound principles, on each.

REALITY - My experience has been (although most people likely don't realize this) - that "many" (so-called "successful") Professionals and Biz Owners are hurting financially - or are highly stressed - with severe burnout … due to rising operational costs / high student loan burdens / heavy admin. loads / politics / etc ... ALL of which can severely "strain" their overall well-being.

I have tried to assist them - to lessen the rat race - to improve their health - and to better secure their financial futures … and in 'other' ways … ways that, sadly, the vast majority of CPAs / Financial Planners / Attorneys / Tax Experts today … simply do **not "**teach" their clients about - or educate them on [regarding … more FREEDOM in their lives … etc].

MINDSET - I've also had *my own* personal share of ugly upsets / challenges / struggles over the years - just like everyone else - and this has caused me to concentrate deeply on my MINDSET (doing my "best" to stay POSITIVE, and Optimistic - not always easy). But I do believe, strongly, in the "power" of POSITIVE SELF-TALK to strengthen our mindset.

PERSONAL: My late wife, sadly, passed recently, from *mesothelioma*, apparently due to *asbestos exposure* - within one of the Special Care facilities that she had worked in, where she was an RN.

But, she and I were blessed with … (2) great sons - (2) sweet daughters-in-law - (4) adorable grandchildren. **:>)**

Our sons are both university graduates … one being a successful Entrepreneur in PEI (owns North America's first "Round, Rotating Home [with (4) Rental Suites on the bottom floor"] **+** a Solar Cruise Boat **+** [3] Solar Pedal Bikes **+** more.

Our other son is the Training Director at Greystone College, in Ontario, Vancouver, and Montreal … and with facilities also in Australia, Ireland and New Delhi.

EXTREMELY "proud" of the accomplishments of both sons! **:>)**

LIFE "truly" has its challenges … its ups-and-downs … but life can also bring its GIFTS.

NETWORK MARKETING / MLM - Many years ago, I was involved [part time] in this industry (as well as in AFFILIATE Marketing). My own experience in MLM spanned over a 30+ year time period, with 'many' different companies [both Pro and Con].

I was also privileged to serve on the Board Of Directors of the 'Association of Network Marketing Professionals' [ANMP.com], representing Canada, for 4 years - so I believe I have a pretty good "feel" for the whole MLM industry [again, both the Pros and the Cons].

And I have many dear friends in the MLM industry - who I deeply respect - and whose friendships I greatly treasure. But frankly, I see MLM as an industry just to simply "tread cautiously" in. NOT that I'm saying MLMs are BAD - **no**. All I say is - just "play it safe".
