

Do You, Too => Love YOUR C-O-F-F-E-E?

Q: What do YOU love about "your" COFFEE?

Perhaps you love your coffee, simply because it's part of so many "perfect moments" - those times when you get to - sit down - to relax - enjoy life - at least for a while (IF that is even possible - in our current world, of - COVID - UKRAINE - CLIMATE CONTROL - POLITICS - ROE -vs- WADE - ASSASSINATIONS - etc - etc)!

Maybe it's the coffee ARMOA. Perhaps (like me) you love how VERSATILE your coffee is ... with different regions contributing their own sublime flavors - and different roasting methods, bringing out the best in each bean ... and the many methods of preparation ... black - latte - espresso - flavored ... creating new, delicious experiences to discover?

NOTE: COFFEE "is" the number one (#1) source of ANTIOXIDANTS within the North American diet! It can help boost our energy and focus in the morning - uplift and awaken our senses, by making us more alert and attentive - and it also help us wind down after our hectic days! 😊

INTRODUCING ...

I know - you most likely "already have" your own favourite coffee - I know "I" did - but then I found:

Melaleuca's MOUNTAIN CABIN Premium Coffee!

A collection of fine - flavorful - masterfully roasted blends - from the finest coffee regions in the world.

Made from 100% **Arabica Beans**, Mountain Cabin offers a complexity of flavors found only in the very finest of coffees. The select areas from which they source their coffee beans are all found between the tropics - and are renowned for their mineral-rich soil, steady temperatures, and distinct rainy and dry seasons. With this '**Mountain Cabin' Premium Coffee**, Melaleuca has brought out the B-E-S-T in all of those qualities. Here's M-O-R-E - - -

Mountain Cabin Premium Coffee is a full line of specialty, small-batch roasted coffees, in a variety of blends, roasts, and flavors. Every single cup is made for coffee “lovers”! 😊

Only The Best Beans Used - To bring us the perfect CUP of coffee, they started with the world’s finest coffee BEANS. ‘Mountain Cabin’ Coffee is made from **100% ARABICA Beans**, and sourced from the world’s choicest high-altitude coffee farms. Arabica beans are superior to other bean types, and are the only choice in the world’s finest coffees.

Scrupulously Sourced - These Arabica Beans are only grown, and harvested, in unique growing locations - all found between the two tropics, in a band around the equator that’s often called the **Coffee Belt**. The exact location of these small “specialty farms”, that grow this coffee, is a treasured secret - and well guarded, so that the whole ‘Mountain Cabin’ experience can remain “exclusive” to Melaleuca customers only.

Meticulously Selected, Masterfully Roasted - Any “premium” blend demands uncommon attention - from farm to roastery. To ensure the flavor - and the integrity - of every single cup - Melaleuca demands meticulous monitoring of QUALITY - at every step.

They have their Arabica Beans hand-selected - with masterful precision, and then small-batch roasted - from **dark** and complex, to **light** and floral - according to the ‘specific bean’ variety chosen.

At various stages, their “master cuppers” TEST the coffee for superior flavor, body, and aroma. AND - that “does” produce a difference - one WE can taste in our very first sip!

YES ... this **COFFEE** (Mountain Cabin) IS special.

I simply wanted to “alert you” to yet one more of this company’s (**400+**) HIGH QUALITY PRODUCTS. 😊

COFFEE is a very “personal” space - for each of us. Have a look at this (6-min) **video** >>>>> [Click HERE](#).
