ChatGPT - Amazing Technology!

Chat GPT is an 'AI-powered **CHATBOT**' (chatbot was originally called 'chatterbot' - [https://www.Chatbot.com/] - which is basically, a computer program, that simulates all human conversation, with an end user. One of the 'best' chatbots at present is … [https://www.ProProfsChat.com/].

ChatGPT (a "version" of chatbot) was created by **OpenAI** ... and it can see, hear, and speak. **ChatGPT** could be used for "many" things … information, summarizing ideas, meal planning, emotional support, work help, relationships … etc, etc, etc.

Have an **eBiz**? - **ChatGPT** could**:** generate leads - book appointments - make sales - service your clients … 24 hours a day … 7 days a week … all FOR you.

We could also say that **ChatGPT** is like a super-smart "librarian", who has read every single book in the library. **ChatGPT** can answer questions, generate creative content, and help with writing and learning, across many topics.

ChatGPT uses 'advanced machine-learning' to understand, and respond, just like a real person. BUT ... just like a real librarian ... **ChatGPT** really does need "context" - in order to give the right answer. For example, the word BAT could mean - a 'baseball bat' - or say, a 'flying mammal'.

So, when using **ChatGPT** on your Desktop, be sure to "give it clear details" for the best responses. Know for sure what you want, and be able to "explain" it concisely - with the applicable context, directions, instructions, etc ...

COST of **ChatGPT**? - NO cost to sign up for an account, but we could go for **ChatGPT Plus** for $20 a month, and get a few more features. However, if we rarely use **ChatGPT**, or just want to see how it works, we can use it 'without' signing up for an account.

How to USE **ChatGPT**? **1)** Go to (https://chat.OpenAI.com) from a browser, and Login, or sign up for it. The 'basic' version of **ChatGPT** is Free … **2)** Put your "prompt" into the message box on the **ChatGPT** page. **3)** Wait for **ChatGPT** to come up with a response.

COMPETITION? - Watch for **DeepSeek** (China) to be doing heavy battle with **OpenAI**.
