Our joint commitment to you

Helping you exceed your investment ambitions

We are delighted to be launching the Global Investment Futures campaign, a joint effort by the City of London Corporation, HM Government and the UK's Investment Association, with the aim of strengthening and promoting the UK as a leading investment management centre globally and as an attractive destination for international capital. This campaign is designed to showcase the significant competitive strengths of the UK as an international centre for financial and professional services.

The UK's unique combination of favourable time zone, language, trusted legal system and global talent, gives us a financial services ecosystem which makes the UK the gateway to global capital and advice.

Our investment management industry is a major UK success story, and a vital part of the British economy. Internationally, the UK is the second largest investment management centre in the world, accounting for approximately 15% of global assets under management (AUM). Assets are managed for clients at home and overseas, and a large number of overseas investors already operate offices in London and other cities.

Our fundamental strengths remain; *we are the best place to do business, the best place to connect to global talent and global markets, and the best place to invest in a greener future.* Our skills and expertise, strength in sustainable investment and green finance, and our pioneering FinTech sector, means that the UK has much to offer to international asset owners.

We are thrilled to be presenting the tangible reasons that make the UK the ideal global location for you to invest, grow and excel in.

**Alderman Vincent
Keaveny**
