Species: Parkinsonia aculeata
Wood is used as firewood and for charcoal and sometimes in paper-making. The wood is considered easy to work, but it is brittle and of dubious durability. It is also small, but may be used for making tool handles, or light poles and posts.

Tree(s) planted in Project Forest Garden Program, Senegal
This agroforestry project, partners with local farmers in Senegal. With your funding the project's local technicians are training 500 farmers on sustainable land management practices, developing tree nurseries, and outplanting 2,000 trees per farmer for a total amount of 1,000,000 trees resulting in hundreds of sustainable forest gardens that will rejuvenate the region, along with creating food security and revenue for the farmers.
