 **Friends of the Saskatoon  
Afforestation Areas Inc.**

Our goal is to promote discussion about trees and forests, and their multiple and essential benefits. The health of trees is being affected by climate change but trees are also a necessary solution in mitigating it. We aim to bring awareness about what trees and forests give us and what we need to do in return to protect and enhance trees and forests. Please Join us in person or virtually. <https://stbarbebaker.wordpress.com/>
