

### Why Nano Colloidal Silver from 50ppm?

Nano means super small. The super small dissolved silver particles can be directly absorbed into the body as it bypasses the digestive system (even for people with a bad digestive system there is an immediate 98% absorption). If the particles are too large, it cannot get into the body. That is why colloidal silver has to be Nano.

If the ppm (parts per million) is "*too high*", for example 100ppm or 200ppm (overdose) then too many pathogens die at once. Dying pathogens release toxins, causing too many toxins to be released into the body and possibly causing a *Herxheimer* effect (old complaints return temporarily and/or unpleasant symptoms occur, e.g. dizziness).

If the ppm is *too low*, for example 15ppm, an *under dosage* will occur and insufficient pathogens will die off and therefore the symptoms will persist.

The *frequency of intake* is also essential. On the first day, take a dose of Nano Colloidal Silver 50ppm every hour for optimal effect. The constant supply will steadily reduce the virus/bacteria pressure. Too much time in between allows the pathogens to reproduce faster than the Colloidal Silver 50 ppm can 'tackle'.

*In short:* with the right Nano Colloidal Silver ppm and the right applications, no one needs to fear infection from any bacteria, virus, fungus or parasite. There is an adequate *natural solution* that works in most situations.

In contrast to *local physical application*, such as Nano Colloidal Silver in the nose, mouth, face and/or hands. Here, the *higher the ppm (200ppm)*, the better it works, the more likely it is that all pathogens will be tackled on the spot.

**Why a natural approach?** After all, the earth has existed for billions of years and man in his present form has existed, according to recent scientific assumptions, for about 15,000 years. What do you think is the chance that 130 years of modern medicine, as we know it today, could *know better what is good for man's health* than the 15,000 years of gradual development of nature?

For more than 25 years now, we have chosen to trust in the knowledge and wisdom of Mother Nature and, to date, her methods have led to the *better lasting results*. Even now, in the recent rapid outbursts of all kinds of sometimes 'strange' symptoms, natural remedies appear to give the best results to maintain and or upgrade our vitality.

**Why Colloidal Silver?** In ancient times, silver was already used successfully to eliminate bacteria, viruses, fungi and parasites. What is less well known is that silver is an important building block in the production of stem cells. Or that cancer is, among other things, a consequence of the lack of silver in the body. All the more reason to use colloidal silver in a working natural approach to the current *viral panic*. Silver is Mother Nature's 'antibiotics', only with the difference that viruses, bacteria, fungi and/or parasites *cannot develop resistance* to its effects. In other words, no matter which new virus variant arises, silver continues to work, unlike laboratory-made synthetic remedies. The fact that silver exists in nature is not for nothing, there is of course a *natural* reason for this.
