MEMO

TO:Ironwood City CommissionFROM:Coleman Engineering Company, Paul Anderson, P.E.DATE:July 5, 2018

RE: Change Order 4 - City of Ironwood Phase IV Utility Project

The attached Change Order 4 resolves a number of issues on the above referenced project. A summary of the main issues is as follows:

- Costs and time for the unforseen conditions pertaining to existing water service lines in the alleys between Lake, Rowe and May Streets. Due to unknown locations of existing laterals, several had to be repaired during the sewer lateral work.
- Costs and time for the unforeseen water main conflict on Washington Street, near Luxmore. The actual alignment of the existing differed from previous records and therefore had to be relaid to accommodate the new sewer main.
- Costs for istalling threaded rods to tie together the 16" sleeves. The existing 16" watermain was slightly oblong in comparison to the new 16" watermain and a specialty sleeve and rods needed to be used in order to tie the two mains together.
- Costs and time associated with changes to the sidewalks throughout the project.

There will be an additional six days added to the 2018 pipe installation deadline and an additional 5 days added to the 2017 pipe restoration deadline. Per Change Order 3, Attachment 2, final restoration of the 16" watermain work has been extended to August 1, 2018 because it was deemed that Ruotsala Construction met all expectations of their winter work on the 16" watermain. This time extension is to allow for full growth of vegetation since all pipework was completed by early March 2018.

Besides the above issues, we will also be balancing quantities for items completed. We will match contract quantity to actual placed quantity. Several instances are adding quantity as well as others deducting quantity. This Change Order is an overall deduct to the contract and has no effect on contingency funds remaining.

Coleman Engineering will be in attendance at the 7/9/18 City Commission meeting to discuss any questions that the Commission may have regarding Change Order 4. The project team is seeking the City Commission's approval and recommendation for Mayor's signature of this Change Order.
