

VIKING

Don't judge this drive by its name. It did not pillage small villages or plunder town after town. It simply looked tough and was made of metal so it became The Viking at our drive naming meeting 10 years ago. It does provide a convenient way to keep your data portable with a classic design that can be laser engraved or silkscreened in 4 different location (Front/Back body, Front/Back Cap) thus making the Viking drive Devastatingly effective.
