Vevor's

Vevor's Button Maker for Crafts is a machine that is versatile with interchangeable molds. It's compact and simple to store making it perfect for personal or commercial use. The ergonomic handle is easy to use, reducing fatigue while making buttons. You can use it to make buttons and badges. Another good option is the Yescom Button Badge Maker, that is user-friendly and is perfect for beginners. You can use it to make high-quality buttons, rope ties, key chains as well as bottle openers.

An image will be needed to put on your buttons if you intend to sell buttons at a craft fair. While a standard printer paper can be used but it's likely to be low-resolution and low saturation. To create intricate images, photo paper is best. Before you begin, cut your design to the appropriate size to fit the machine. It is important not to make the design too small or it will not function properly.
