

PRESS RELEASE

West Coast Hip Hop Artist SpenDoe Brings Forth New EP Titled “WEST COAST”

Santa Cruz, CA hip hop artist [SpenDoe](#) is continuously releasing new music, and working his way toward the masses with his refreshing sound. SpenDoe is known to deliver a wide variety of sounds, and has proven himself to be a true songwriter and creator of many things. With his new five-track release, SpenDoe brings forth his signature west coast sound, but with a solid energetic twist.

The production on this release is handled by Sacramento Mobbmuzik producer/rapper C-DUBB, on four of the tracks. Vallejo, CA music producer The Slapmaster produced one track. The new release contains no feature artists, with SpenDoe delivering some serious lyrics about life. When discussing the good times, SpenDoe always makes sure to mention the struggles, and sheds light on topics related to everyday life. While SpenDoe represents his home state, he is an artist with a love for many other places.

“WEST COAST,” as SpenDoe puts it... is exactly that. He embraces the culture, as a whole. This California life has educated SpenDoe, in many areas. Music listeners will surely hear the California artist shout out his home state, and deliver catchy wordplay over production from two of Northern California’s well known producers . This release is for those who share a love for the “Golden State” and the west coast as a whole.

The new release kicks off with the C-DUBB produced “The Live We Live.” This track is definitely a “mob music” sound, reminiscent to the sound which was popularized in Northern California’s bay area music scene of the 90’s and early 2000’s. Another standout track is titled “Rollin Up” which shows SpenDoe slowing things down, and expressing his thoughts, feelings, and ways to unwind.

As an independent artist, SpenDoe is constantly creating. He is always working his name as an artist, while balancing the responsibilities of the business. The new release will be available on 10/31. Listen to SpenDoe on all music platforms, worldwide.
