PERSONAL PROJECTS

OX
WEB APP
2018

Web shop for Apparel and Clothing. I developed the shopping cart with Java Script. The web shop is temoporary and has no database, it works with local storage and sends an email with shopping cart info.

NoteIT
WEB APP
2017

Business idea for a web-app. Our pitch won first place in the Entrepreneurship course that year. We were evaluated by four startup investors from MK. This is also my final thesis and I'm currently working on the development part.

Biocybernetics
SPREADING MODEL (COMPLEX NETWORKS)
2016

Our task was to change the values in the parametric matrix B in order to monitor the values of the various system states. I was displaying the mean values in all state in images and interpreting the results.

RANGGO – Team project
WEB APP
2016

Web-app for ranking famous people. This was a 10 students team project for the course of "ICT project management" (at University).
A short video with the main idea about the project: https://goo.gl/Mg8cxN)

Analysing healthy and cancerous tissues
R&WEKA
2016

Team project (University). We worked with SVM, Naïve Bayes, KNN and decision trees in R
