- | YEAR | 2016
- | CONCEPT | complex grid structure with individual student 'cells' and vertical and atrium gardens
- | PROGRAM | student dorm, hostel, library, gym, pool, restaurant, lobby

This architectural project is a comprehensive study of a modern residential building. It explores the integration of a complex steel frame structure with glass facades and rooftop greenery, set within an urban context. The design aims to create a sustainable and functional living environment.

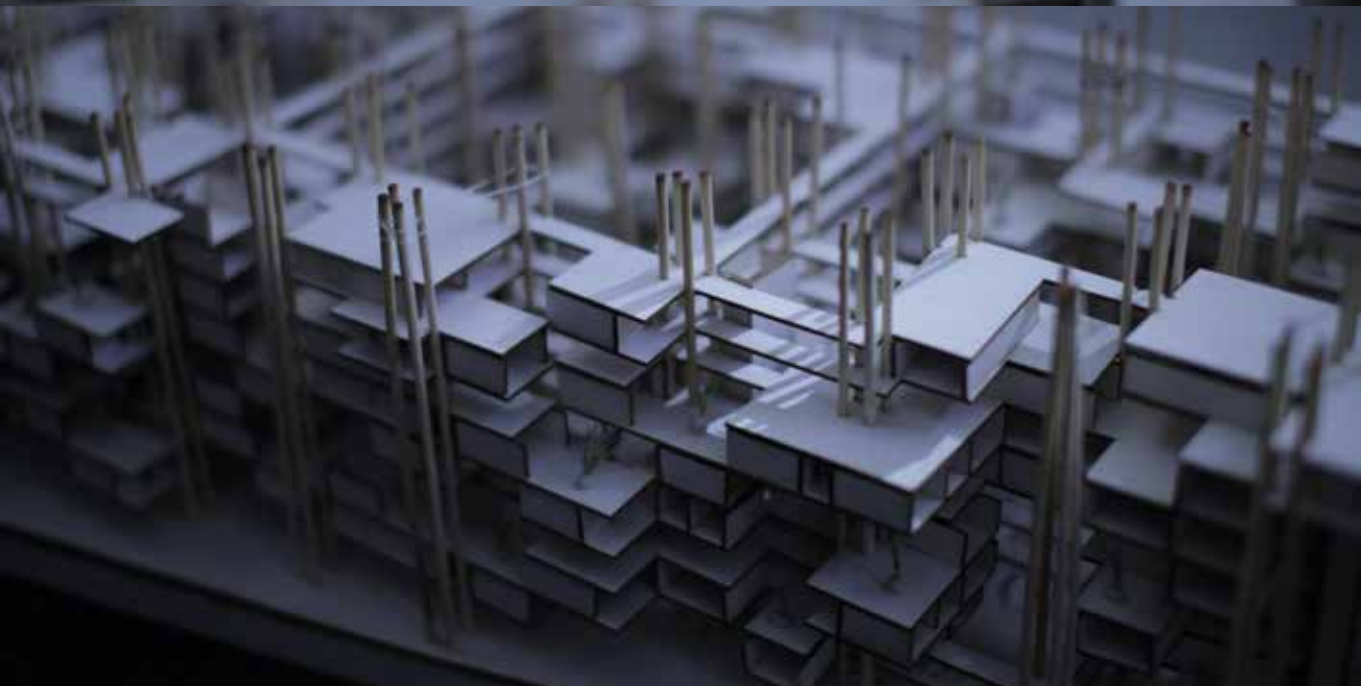

Architectural Plan
 This diagram illustrates the overall layout of the building, showing the arrangement of rooms, corridors, and structural elements. It highlights the building's footprint and its relationship to the surrounding urban grid.

Structural Framework
 This diagram shows the building's structural framework, detailing the steel frame and the placement of columns and beams. It emphasizes the building's verticality and the integration of greenery on the roof.

Vertical Section
 This diagram provides a vertical cross-section of the building, showing the internal spaces, structural elements, and the placement of greenery on the roof. It illustrates the building's height and the integration of natural elements.

Horizontal Section
 This diagram shows a horizontal cross-section of the building, detailing the internal layout of rooms, corridors, and structural elements. It highlights the building's footprint and its relationship to the surrounding urban grid.

Site Plan
 This diagram shows the building's location within the surrounding urban context, highlighting its relationship to the street grid and other buildings.
