

## **Monika Petkova**

### **Profile**

*I am an ambitious young engineer, motivated by success and improvement. It is in my nature to always thrive towards discovering new things with the goal to become better person and more experienced professional. So far my experience has taught me how to work well in teams and efficiently plan project development in order to meet tight deadlines.*

*My motto is: If you try – you might, if you don't – you won't.*

*Working as ABAP Developer with almost 2 years of experience in implementing and developing SAP solutions gave me an advanced knowledge of SAP Logistics processes, business integration and solution architecture. I have gain an experience with international and local SAP implementation projects, business consulting and solution architecture, developing, testing and training concepts, interfaces with different systems.*
