## Exposing ecommerce scams and helping consumers stay informed

Name of ecommerce scam

### Clear Sound 911 by Phytage Labs

Claim made by ecommerce scam

### Cure hearing loss and tinnitus by “unrusting” hair cells

Price of Ecommerce Scam

The screenshot displays the product page for Clear Sound 911 by Phytage Labs. On the left is a white bottle of the supplement with a blue and yellow label. A gold seal with a red ribbon says "FREE SHIPPING" and "FREE SHIPPING" twice. The label on the bottle includes the Phytage logo, "CLEAR SOUND 911", "Healthy Hearing Support Formula", and "Super Vitamin B / Herbal Complex". It also lists benefits: "Supports Potential of Clear Hearing", "Aids Sensing of Auditory Nerve", and "Aids Flushing of Auditory Nerve". The bottle contains 30 capsules.

On the right is a green button that says "START HERE". Below it is the heading "Step 1: CHOOSE YOUR ORDER". There are three options for purchasing the product:

Quantity	Price	Original Price	Image	Selection
1 BOTTLE	\$69.95			<input type="radio"/>
2 BOTTLES	\$119.90	<del>\$139.90</del>		<input type="radio"/>
4 BOTTLES	\$199.80	<del>\$279.80</del>		<input checked="" type="radio"/>

Below the options is the heading "Step 2: ENTER YOUR DETAILS".

## Main Report

This report will correspond to the web page and ecommerce scam meant to advertise the product. At the end I will make timestamps of questionable pseudoscientific claims false statements that show up in the video, but I also will quote the website directly. I will do my best to help the consumer see that this product is a scam that will not cure tinnitus or hearing loss.

-  
On the official web page we are introduced to Jerry Robinson. Jerry is 47 years old and has severe degenerative hearing loss. Jerry is struggling to maintain a healthy relationship with his wife and kids and he is desperate to find a solution to his hearing loss that destroyed his life. Fast forward Jerry reads on the internet that pouring a special oil in his ear canal will cure hearing loss. He decides to try it. Jerry pour oil into his ears because he read online that would cure his hearing loss. He almost died doing this but was resuscitated in a hospital.

Sometime, maybe a few weeks later Jerry and his wife meet a scientist named Danny at their honey moon. Jerry tells Danny the scientist about his hearing loss. It is then that Danny reveals a secret in which big pharma (allegedly) is suppressing the cure for hearing loss. Danny explains how toxic chemicals and plaque build up inside the inner ear while slowly leaking their way into the brain toxifying it as well. He explains that the toxins and plaques stiffen hair cells and prevent them from sending signals to the brain.

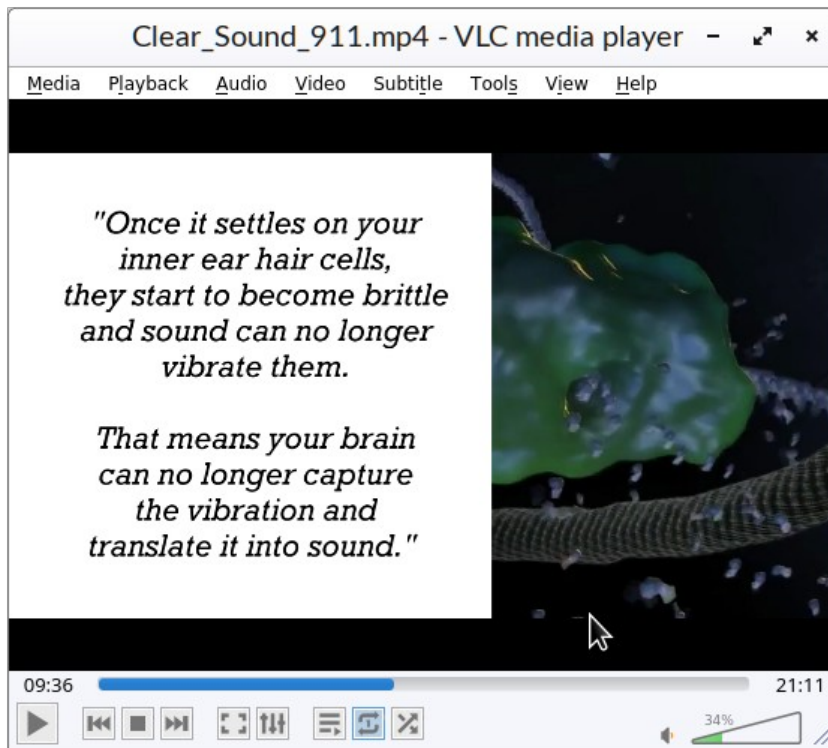

[Viewer Note](#) **THIS IS FAKE SCIENCE. They lie about hair cells rusting and toxins infecting the brain to sell a scam!**

(Following up) In the story Danny the scientist hands Jerry a digital thumb drive with the ingredients to Clear Sound 911. It “allegedly” works and Danny is cured of hearing loss through a special diet alone. Danny conducts a scientific clinical trial to test the ingredients. He test 1,847 individuals and all of them report success. After going through fake testimonials of others and a false claim that to this day ultimately 78,626 people were cured of hearing loss. Phytage Labs Clear Sound 911 is advertised as a 60 day money back guarantee.

[Viewer Note](#) **THIS IS ALL BULLSHIT AND IT NEVER HAPPENED. Just a filthy scam by the known scammers at Phytage Labs!**

## Scam Highlights in Phytage Labs Video advertisement

### ***Hair cells can rust from loud noise (9:39)***

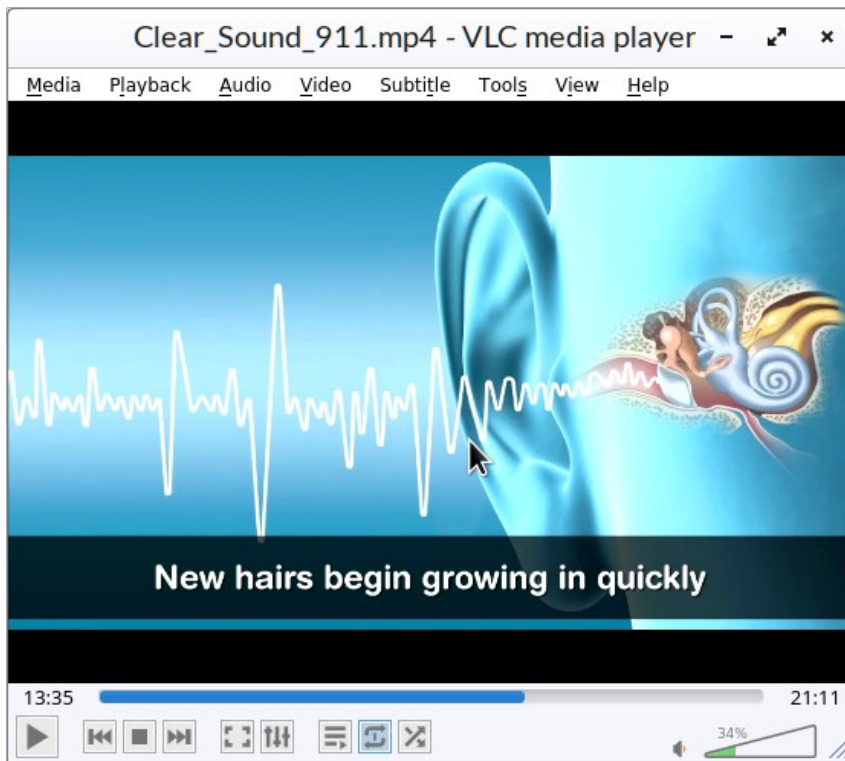

### ***Fake Clinical Trial to cure hearing loss (13:06)***

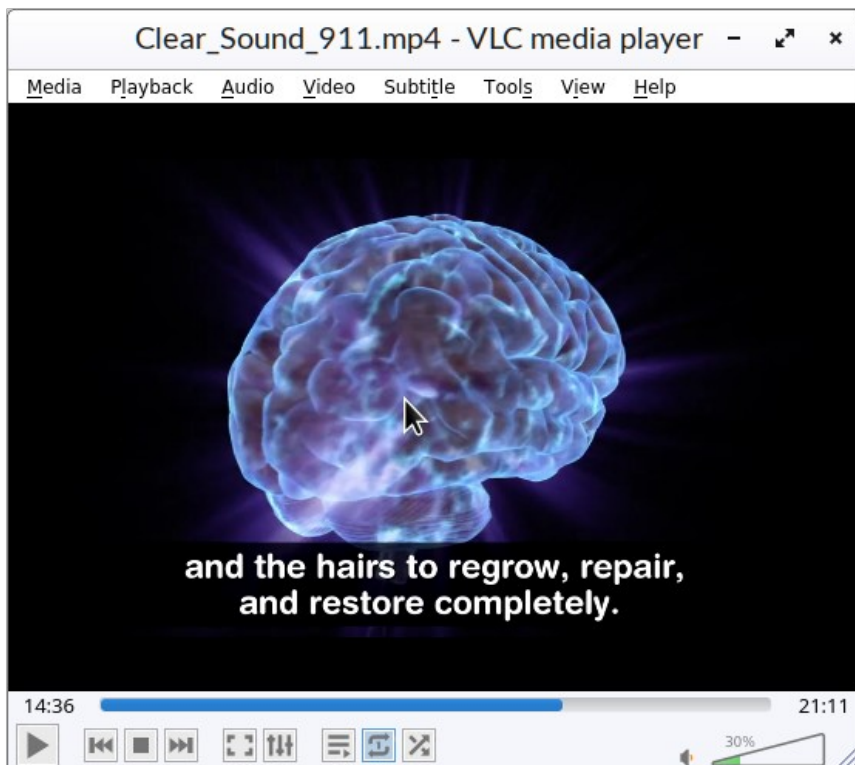

## Highlighted claims about regenerating cochlear hair cells

(13:35)

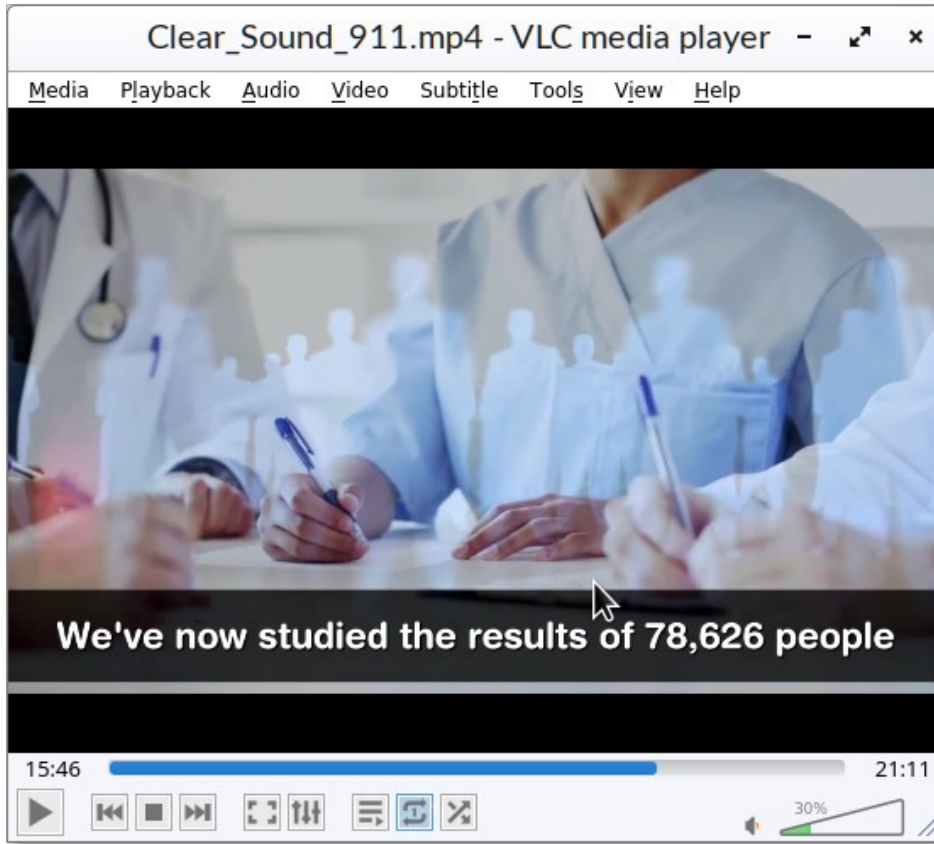

(14:36)

# The false 78,626 cure claim

15:46

<https://www.clearsound911.com/cs911plufv1/>

What you're about to learn **has helped 78,626 people** and that number keeps climbing every day.

If you can't afford an arm and a leg for implants and want a natural solution...

Even if you just want to save that money for something else...

Or you have faith in a natural program to revive your hearing...

**I advise you to read this whole presentation...**

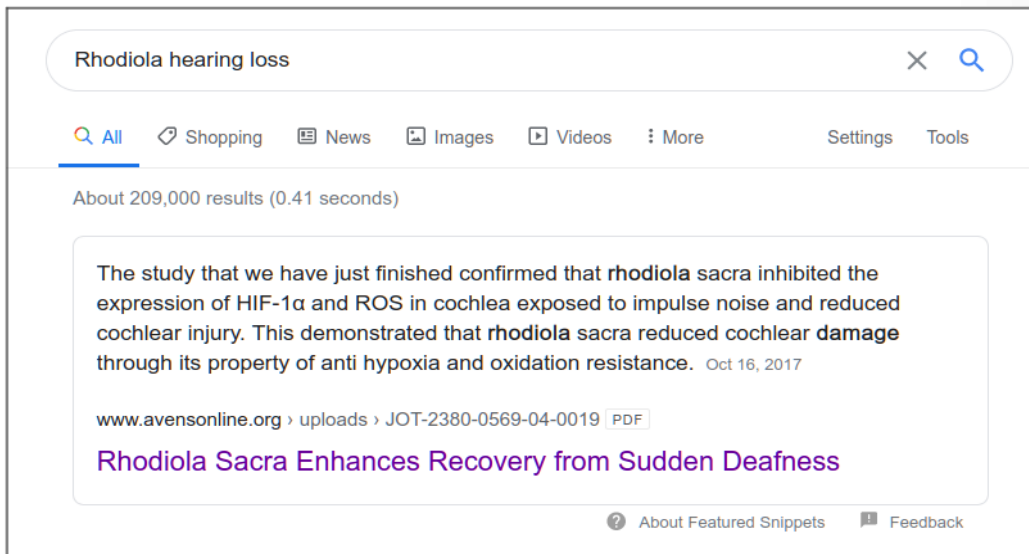

It could change your life, too, like the tens of thousands of others who have experienced it already.

# Ingredients

click on each ingredient to show info about it.

## Rhodiola

*Science does suggest Rhodiola does treat sudden hearing loss but there is no evidence it completely cures hearing loss as Phytage Labs claims.*

## Potassium

*The Membranous labyrinth is a collection of fluid filled spiral tubes in the inner ear where the cochlear sensory hair cells nest.*

*These hair cells bathe in a potassium rich fluid called Endolymph. The scammers at Phytage Labs decided to twist this science to make it look as if taking potassium supplements would cure hearing loss. Maybe it will help with people that have extremely low potassium. But over all it is **NOT a cure!** The whole hair cell rusting thing is also complete BS.*

## Magnesium

*There is evidence magnesium can reverse short-term hearing loss by reducing cochlear inflammation. I have to be honest. Maybe this could help mildly improve hearing but there is no evidence this will completely restore hearing and reverse permanent nerve and hair cell damage.*

## Ashwagandha

*Ashwagandha allegedly treats many diseases. This in itself is a red flag.*

*Ashwagandha is a plant. The root and berry are used to make medicine.*

*Ashwagandha has a lot of uses. But so far, there isn't enough information to judge whether it is effective for **any of them**.*

*Ashwagandha is used for arthritis, anxiety, bipolar disorder, attention deficit hyperactivity disorder (ADHD), balance, trouble sleeping (insomnia), tumors, tuberculosis, asthma, a skin condition marked by white patchiness (leukoderma), bronchitis, backache, fibromyalgia, menstrual problems, hiccups, Parkinson's disease, and chronic liver disease. It is also used to reduce side effects of medications used to treat cancer and schizophrenia. Ashwagandha is used to reduce levels of fat and sugar in the blood.*

*Ashwagandha is also used as an "adaptogen" to help the body cope with daily stress, and as a general tonic.*

*Some people also use ashwagandha for improving thinking ability, decreasing pain and swelling (inflammation), and preventing the effects of aging. It is also used for fertility problems in men and women and also to increase sexual desire.*

<https://www.tinnitus.org.uk/why-tea>

Lots of these ingredients and flowers and found in teas. So I listed teas above. There is **NO EVIDENCE THEY TREAT TINNITUS AND HEARING LOSS!** But they do help anxiety.

Lemon Balm

*Skullcap*

*Hawthorn*

*Bacopa*

*Magnolia*

*Passion Flower*

*Valerian*

-

I'm not going to waste your time going into technical detail over these ingredients as you will soon see why I consider this product a scam.

1. There is zero scientific evidence hair cells rust. Phytage Labs also borrowed this from another scam artist.

2. Phytage Labs is a notorious company with tons of complaints.

# Debunking Pseudoscience

The science of the inner ear is unfortunately extremely complex and goes way over my head. But the basics you need to know is that the inner ear also known as the cochlea is a snail shaped organ that houses tiny sensory cells called “hair cells”. If these cells or their nerve connections get damaged hearing is lost permanently. [Cochlear hair cells do NOT regenerate in mammals ever](#). Nor do they rust. Viral infections to the nerves and vascular (blood flow) disorders in the inner ear do happen but are **NOT** the main cause of hearing loss. As science and [statistics](#) is telling us that [loud noise exposure](#) is the most common cause of hearing loss. This causes hair cells and nerve connections to die not get infected or rust.

Phytage Labs completely bullshitted about hair cells rusting by perverting studies on very specific cases of cardio vascular disorders causing hearing loss. Much like a previous scam “Zenith Labs” which had a propaganda video about hair cells rusting. There is real science about subtypes of hearing loss caused by blood flow problems. But it is far less common then noise exposure and it’s usually far cheaper to by generic supplements then this crap.

Once again, the science is suggesting that this is usually associated with **SUDDEN HEARING LOSS and VIRUSES**. Not slow degenerative exposure caused by loud noise. Phytage Labs and previous scam company [Zenith Labs](#) are just wasting your time and money. The sudden hearing loss is a sub type and has a short therapeutic window. They want to hype that damaged hair cells can be restored to give false hope.

Furthermore Phytage Labs Clear Sound 911 outright **LIED** that they can regenerate cochlear sensory hair cells. It’s such a shame that [actual bio-tech companies](#) have studied for decades about doing this. Thus the scammers at Phytage labs are insulting the hard working men and women invested in understanding the deep biological sciences. Plus earlier I debunked pseudoscience in the [Ingredients](#) section.

# Fake Testimonials

I hold the view everyone of these testimonials is fake.

Before I begin. These testimonials came from [Phytage Labs Clear Sound 911 official website, checkout page](#) and their [ecommerce video](#). I pledge not to link the official website because it is unsafe and desperate people will fall for it..You can find it on a Google search If you must.

---

## **Tara Kim San Francisco, CA**

"I finally retired and have plenty of time to spend with my grandchildren, so the last thing I needed was to worry about hearing loss. Thankfully, my daughter saw an ad for Clear Sound 911, and before I knew it, the package appeared on my doorstep. I can't believe the difference it's made already! I can clearly hear my granddaughter singing and my grandson calling to me from the yard. I love being a grandmother, and I love Clear Sound 911, too!"

## **Sean Hagary Anchorage, AK**

"When I first got Clear Sound 911 I was very skeptical. I mean, everything says, "It works", but really? At my age though, I knew I had to do all I could to maintain my hearing. With the proven clinical results the ingredients in Clear Sound 911 have shown, I wake up each day not just feeling, but knowing, I'm on the path to my best ear health possible."

## **John Alaire New York, NY**

“Even though I don't like usually giving reviews I have to share my thoughts on this one. It's been a bit over a month since I ordered my first bottle and since that time, I've felt as though my hearing has actually improved. My wife now calls me in the house, and to her surprise, I can actually hear her and repond! This product works for me I highly recommend Clear Sound 911.”

## **Jim Sawyer, Age 71**

“I recommend this to everyone with age related hearing problems. I felt goofy in hearing aids and absolutely detested having to wear them. When my friend, Fred, told me about it, I thought it was worth a shot despite being skeptical from the start. I wanted it to work so I could get rid of the hearing aids. Now I'm like Fred, I tell everyone I know about it. I even started educating them about inner ear health and the nutrients that make the repairs and protect you. And I'm not the only one surprised I have my hearing back. People have grown used to basically yelling at me to get a word in. Now I can even hear a whisper... And everything I'm telling you right now is just scratching the surface. The real benefits stay between me and my wife... I get compliments everywhere I go and the feeling of being so aware of what's going on around me is life changing. I'm having more success in my business, and I enjoy it more, too. Lastly, those hearing aids stay put away... for good.”

## **Jim from Palm Beach (different Jim)**

*That way you, too, can experience the amazing healing properties of Clear Sound 911™ just like Jim from Palm Beach who says...*

*“Clear Sound 911™ was a no risk, no brainer for me. Because of their money back guarantee, I gave it a shot. I had nothing to lose... I had already lost my hearing a long time ago. I got the 4 month supply, and I'm incredibly surprised that my hearing has been completely restored. My friends and family were just as shocked as I was... If you are experiencing age-related hearing loss, I'll tell you the same thing I tell everyone else. Get Clear Sound 911™.”*

*Why should you not buy Phytage Clear Sound 911? What if I am deceiving you into not curing yourself of tinnitus and hearing loss?*

Well let's start with that assumption and play devil's advocate that I'm a meany that doesn't want you cured of hearing loss. What about this?
