[About me](#)

Main Report

The story of the Quietum tinnitus supplements is about a Professor of Anatomy; Patrick Bark, aged 50, who suffered from severe tinnitus. He got tinnitus out of the blue one day, and wants answers. For some mysterious reason his tinnitus is also accompanied by restless spasms in his arms and severe head aches.

As the story unfolds we watch the tragedy of Patrick struggling to function at work and home. One day he snaps into a fit of rage and smashes the TV. Screams at his wife and kids, and then threatens to burn his own house down; as his family watches in horror. He is then escorted to a mental hospital. After returning he gets in touch with a US Government (Department of Defense) alternative researcher that specializes in neuroscience. We learn that he is world renowned for his special brain surgeries. His nickname "Doctor S" is all we ever get to know about him.

We learn that the US Government has a secret cure for tinnitus that only the most elite soldiers are given. This allows the most hardened & seasoned soldiers to continue combat; where as without treatment, they would have no choice but retirement. A clinical trial by Doctor S is conducted, and 53 people are participating. All 53 men and women are successfully cured of tinnitus. The ones with hearing loss also reported major improvements in hearing. The supplement goes viral and 197,357 people are allegedly cured of tinnitus using the novel Quietum remedy developed by Dr. S with the help of anatomy professor Patrick Bark. Too bad it's all a **SCAM!**

Debunking Pseudoscience

The following claim (image attached) was made. It was also asserted that damaged nerves; (unspecified between cochlear or central); were frayed. A brief sect of the video compared damaged nerve fibers to damaged wires. Once again they claimed that this is the root cause of tinnitus, and of course they (using secret US military technology) can reverse it.

The problem is that real science is suggesting any form of hearing loss can cause tinnitus, and they (at Quietum) are correct that tinnitus is caused by nerve damage. So in theory reversing the nerve damage can cure tinnitus.

Q: Right? So Reversing the neuropathy will fix the Tinnitus?

A: Yes, the only problem is, this is a shitty shady untrustworthy company. Why should you believe they have a cure? Follow me to the next page to see how they are just as bad as all the other scammers I covered in my previous reports.

Ingredients (clicking will redirect page)

Red Clover

Red clover has been studied in people, but the **research hasn't shown clear benefits for any health condition**. Like peas and beans, red clover belongs to the family of plants called legumes. Red clover contains substances called isoflavones. Isoflavones are phytoestrogens—compounds similar to the female hormone estrogen

Sage (source <https://www.sciencedaily.com/>)

Sage is an herb native to the Mediterranean. It belongs to the same family as oregano, lavender, rosemary, thyme, and basil.

-

New research has proved that sage can improve memory, confirming centuries-old theories. British scientists have carried out the first clinical trials with healthy, young adults and found that those who had taken sage oil capsules performed significantly better in a word recall test.

Black Cohose (source Wikipedia)

[Native Americans](#) used black cohosh to treat gynecological and other disorders.^{[2][4][8]} Following the arrival of European settlers in the U.S. who continued the use of black cohosh, the plant appeared in the U.S. Pharmacopoeia under the name "black snakeroot".^[2] In the 19th century, the root was used to treat snakebite, inflamed lungs, and pain from childbirth.^[9]

Black cohosh is used as a dietary supplement marketed mainly to women for treating [gynecological](#) problems,^[4] but there is no [high-quality scientific evidence](#) to support such uses.^{[8][6][10]}

Dong Quai Giseng (study)

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4582451/>

A relative of this plant does have evidence of helping tinnitus. I recommend buying the relative “Red Giseng” individually as opposed to this supplement using a unsupported kind.

Licorice (source healthline.com)

Licorice root extract is tied to several other potential benefits. It may:

- **Aid diabetes.** In a 60-day study in rats, daily intake of licorice root extract resulted in significant improvements in blood sugar levels and kidney health. This effect has not been confirmed in humans ([31Trusted Source](#)).
- **Reduce menopause symptoms.** Licorice root extract has been proposed as a [treatment for hot flashes](#) during menopause. However, the evidence on its effectiveness for this purpose is limited ([32Trusted Source](#), [33Trusted Source](#)).
- **Boost weight loss.** Some studies indicate that licorice root extract lowers [body mass index \(BMI\)](#) and supports weight loss. Yet, other studies have not found any effects on weight ([34Trusted Source](#), [35Trusted Source](#)).
- **Help treat hepatitis C.** One test-tube study noted that adding glycyrrhizin to a standard hepatitis C treatment significantly reduced the virus’s spread. While promising, these results have not been confirmed in humans ([36Trusted Source](#), [37Trusted Source](#)).

Other ingredients with no supporting evidence

- Blessed Thistle (Herb)
- Rep Raspberry (Fruit)
- Soy Isoflavones
- Partridge Berry
- Mexican Yam

Nothing is published on these plants or their chemical components as a treatment of tinnitus. Due to the fact that they have provided no scientific evidence, we can dismiss them as unsupported and unknown effectiveness.

Fake Testimonials

The following Testimonials are fake and made by special computer generated templates. The ecommerce companies trick people into buying products using this method. I would also like to acknowledge that the pseudo social media post have 4000-8000 likes. I will also try to reverse image search content, to prove fraud.

Match Found = Fraud Proven

A screenshot of a Facebook post. At the top left is a profile picture of a woman with blonde hair, smiling. To her right is the name "Anna Brighton" and "5hrs" with a globe icon. In the top right corner are three dots. The main text of the post reads: "I never thought I would get to see the day when my ringing stops! But I did! Oh my God, after 5 horrible years, I can think, I can sleep, I can relax. I feel like a human being again. God bless you, Patrick!". Below the text is the word "MATCH" in large, bold, red, sans-serif capital letters. At the bottom left is a thumbs-up icon with "1K" next to it. At the bottom right are "200 Comments" and "50 Shares".

If it were for me, I would've never touched your pills, Patrick. Your theory just sounded crazy, no offense, but my wife kept insisting. I still can't believe it's been 1 month since I haven't heard any whooshing or hissing. I feel reborn! Hope many more honest folks found out about this!

I think these pills fixed a lot more than the buzzing faulty wire in my brain...
 I think they fixed all the wires! Asides from tinnitus,
 I also had brain fog, depression and I kept forgetting things.
 Now my mind feels sharp and crystal clear, I am so focused and calm
 that my family doesn't recognise me anymore.
 My head is so quiet, and I'm sleeping like a baby all through the night.
 My older son takes them now. He does not have tinnitus,
 he takes them for his insomnia and says he can finally sleep now.

It's like a terrible curse has been lifted. I feel so blessed and alive. I had a buzzing in my right ear and an annoying pulsing sensation in my left ear all the time before I started this treatment...all gone now. After two months, guess what? My brain fog disappeared... As I got older, I used to fear a lot of things, like severe memory loss or hand tremors. Not anymore, I feel like I've found the fountain of youth or something.

Just threw my hearing aids away! You heard that right! At 68, I don't need them. Seeing how good I feel, I don't think I will ever need them. For 5 years it felt like I had a tea kettle inside my brain. Now it's all silence. I have a lot more energy and my mood keeps getting better. I'm telling everyone I know about this!

Final Words from author

There is nothing I can do but advice you to stay as far away as possible from this product.

You can read more about the previous scams I busted below. All of them contain very similar themes to this one. You can find the same gimmicks from this scam in other scams I written up.
