

## **Why Cyber Security is Important?**

Do you think your data or the cellphone you use are safe during this increased rate of [cyber-crimes](#)? With the increasing usage of the [internet](#) in our daily lives, the attack by intruders on our electronic devices like mobile phones and on our personal data has increased a lot. To [protect from these attacks](#) you need to know **why cyber security is important to all of us.**

The [cyber threat](#) is increasing at a rapid pace and the number of data breaches is increasing at an alarming rate every year. [Malicious criminals](#) mainly use these techniques against retailers, medical service, and even against the [government to gather many sensitive data](#) and financial information which are not to be disclosed. The integrity and confidentiality of these data need to be protected. That is why **the importance of cyber security** cannot be underestimated.

## **System based cyber-attacks and the importance of computer security**
