Dear Allan,

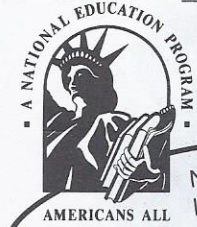

For the past several years, your organization has been kind enough to provide access to *The American's All* program. Excerpts from this program are included with the Cram *Discovery Program*. This is a Kindergarten – Grade Three social studies program.

*The American's All* materials have been invaluable to us. They integrate well with the history and geography components of our program. They provide a balanced, grade level appropriate account of America's diversity. We find that teachers are comfortable using the format and with the content.

So, thank you Allan for your program and your willingness to share this with Cram. A large part of the success of *The Discovery Program* is tied directly to your product.

Regards,
