

Natural approach Bugs Buster:

Colloidal Silver Nature's 'anti-biotics'

A natural approach to pathogenic microbes.

Silver is Mother Nature's 'antibiotic', only with the difference that viruses, bacteria, fungi and/or parasites *cannot develop resistance* to its effects. In other words, no matter what new virus variant arises, silver continues to work, unlike laboratory-made synthetic remedies.

There is of course a *natural* reason why silver is found in Nature!

Why Nano Colloidal Silver and why 50ppm or 250ppm?

Nano means *super small*. The super small dissolved silver particles can be absorbed directly into the body as it bypasses the digestive system (even for people with a bad digestive system there is an immediate 98% absorption). If the particles are too large, it cannot get into the body. That is why colloidal silver has to be Nano.

Effect of oral over-dosage: If the ppm (parts per million) is "*too high*", for example 100ppm or 200ppm then too many pathogens die at once. It is known that dying pathogens release toxins into the body, which can cause a Herxheimer effect (Herxheimer means: old complaints return temporarily and/or unpleasant symptoms occur, e.g. dizziness).

Effect of oral under-dosage: If the ppm is *too low*, for example 15ppm, an under-dosage will occur and insufficient pathogens will die off and therefore the symptoms may persist.

The frequency of intake is also essential. On the first day, take a dose of Nano Colloidal Silver 50ppm every hour for optimal effect. *The constant supply will steadily reduce the virus/bacteria load*. Too much time in between allows the pathogens to reproduce faster than the Colloidal Silver 50 ppm can 'reduce'.

Contrary to local physical use, such as Nano Colloidal Silver in the nose, mouth, face, hands and especially in case of injuries. For local use, *the higher the ppm (200ppm), the better it works*, the greater the chance of tackling all pathogens on the spot.

Application Bugs Buster scheme:

On Page 2, we have listed in a concise schedule the application of the Bugs Buster approach. The Bugs Buster 1 litre 50ppm is the basis of a cure of at least 9 days.

Start Bugs Buster 1 Litre 50ppm at the first signs of infection.

Start the Bugs Buster 50ppm immediately at the first signs of flu symptoms, Cough, respiratory problems, cough combined with elevation and or fatigue, runny nose, headache, sore throat, or combinations thereof, among others. Start by taking 15 ml from the 1 litre bottle of 50ppm according to the schedule (1st day take every hour) on page 2. As soon as symptoms clearly reduce the same day, you can start step 2 the next day. If symptoms do NOT reduce sufficiently, repeat step 1 one more day. In that case, start the third day with the follow-up step 2.

Step 2 is basically a transitional day. Step 3 and at least the next 7 days are meant as a maintenance dosage. This is to ensure that the pathogenic microbes have been sufficiently tackled by the silver. For full explanation see diagram page 2.

It goes without saying that the Nano Silver spray 250ppm and the nasal spray 200ppm are used simultaneously if there is a sore throat and or a blocked nose. There are no known harmful side effects, so you can use the Spray and the nasal spray as often as necessary. .

Tip:

Our suggestion is to include *the basic kit in your first aid kit*. As soon as the first symptoms appear, the infection can be dealt with immediately. This can be essential in preventing a possible *cytokine storm*.

Note: *This information is intended only for men and women who have acquired the Bugs Buster package.*

Suggestion intake Bugs Buster for an adult:

Step 1 (day 1)	<i>Before starting the Forever Vital Bugs Buster (BB)50ppm, read page 1: Start the BB 50 ppm, orally 15 ml every hour (for nose and throat symptoms use the 250 ppm for local use, as often as needed. See page 1 for more information when to go to step 2)</i>
Step 2 (day 2) transition day	Bugs Buster 50 ppm, orally 5x 15 ml (for nose and throat conditions use the 250 ppm for local use, as often as needed).
Step 3, repeat for at least 7 days	Bugs Buster 50 ppm, orally 3x 15 ml (for nose and throat conditions use the 250 ppm for local use, as often as needed).
Step 4	Maintenance see below
Maintenance	It may be necessary to continue a maintenance Bugs Buster dose after the cure to strengthen the immune system, keep the pathogenic microbes pressure in check.
If further assistance is required:	If you would like assistance in assessing whether this applies to you or one of the family members, there is the possibility of doing either the supplement test or Vital Blood Scan to measure your level of vitality.

- Nano Colloidal Silver Bugs Buster 50ppm : Oral use see above schedule
- Nano Colloidal Silver spray 250 ppm : Local use, spray into mouth, face and or hands
- Nano Colloidal Silver Nose spray 200 ppm : Topical use, in each nostril 2 to 3 pinches, as often as is needed. No harmful side effects are known.

If Bugs Buster Immune Booster: add to the Bugs Buster schedule:

- Intake [Immune Forte powered by Vitamin C](#) : 2-3 sprays three times a day directly under the tongue
- Intake [Green Vitality Boost](#) : at least 1x per day if desired 2x per day

Intake suggestion for an adult (>12 year):

- 1 scoop **Green Vitality Boost** with one glass filtered water
- 1/4 teaspoon SOL (solution of sea salt). For SOL recipe see QR code 
- 1 table spoon olive oil (cold press) all in a shake beaker => shake well & drink
