

Hermystica works in synergy with the Electro Magnetic Vitalizing ornament (EMV).

The EMV harmonises and balances your electromagnetic field so that your body can be alkaline which is *the* requirement for your body to be capable in producing molecular Oxygen. (for more info see the [EMV Video](#))

As we all know Oxygen is the major fuel our body needs to function properly. The biggest Oxygen consumer is our head(brain). Mind you an acidic body is an environment in which for example cancer cells or pathogens thrive. In this acidic environment the body has less oxygen available, and this 'lack' will damage eventually your cells (including your brain cells) and eventually effect your organs. The EMV supports your body to keep your electromagnetic field in the correct balance (due to its turning mechanism, it continuously adjust to the earths magnetic field) and due to this you assist your body to stay alkaline and increase in this way the available oxygen.

[Hermystica](#) also supports this process due to its capacity to bind with oxygen. The nano size of Hermystica makes it possible to reach even the smallest capillaries like in your eyes and in the lungs. It assists in taking away toxins and contribute oxygen. This is why many people use Hermystica for eye issues or breathing problems. Hermystica and the EMV ornament together supports or improve symptoms like:

- Strengthens one's immune system
- Raises oxygen levels
- Increases blood circulation
- Alleviates physical stress, stiffness, cramps or discomfort
- Cataract
- Glaucoma
- Relieves fatigue and tiredness
- Skin diseases
- HIV immunodeficiency
- Vaccine damage
- Interferon production (increasing especially gamma interferon)
- Information flow in the body (improving - semiconductor property)
- Increasing the cytolytic effect of natural killer cells
- Cancer
- Circulatory diseases
- Macrophages (activation of the body's own dormant phagocytes)
- Malaria
- Metastases (preventive effect)

- Crohn's disease
- Multiple sclerosis
- Multi-resistant germs (especially MRSA)
- Scars (and scar growths)
- Retinal detachment
- Osteoporosis
- Physiological basic functions (normalising)
- Psychosis
- Raynaud's disease
- Hyperacidity
- Supporting the dissolution of toxic oxygen species
- Visual performance (improving)
- Schizophrenia
- Stroke (possibly protective effect by improving blood viscosity)
- Analgesic effect (up to use as an anaesthetic (narcotic) without risk of overdose or side effect)
- Pain (chronic)
- Radiation protection
- Radiation
- Binding of harmful heavy metals (e.g. cadmium, lead, mercury)
- Heavy metal exposure
- Staphylococcus aureus (MRSA see above)
- Acidosis
- Diseases of the digestive tract
- Poisoning (preventive)
- Binding of acidifying hydrogen atoms (cf. hyperacidity)
- Wound healing
- Promotes quality sleep
- Slows down aging
- Regulates positive and negative ions within the body
- Counteract harmful positive ions generated by electrical and electronic appliances (e.g. mobile phones, computers, televisions) and industrial wastes

It should be noted that the above benefits experienced may vary from individual to individual.
