

GOLDEN DUO

for Vitalizing body & mind

Mag L-Threonate Brainpower & D-Cal Cell Repair

Frequency enhanced

IMPROVE:

- Thinking capacity & consciousness
- Strengthening your bones
- Muscle relaxation (incl. the heart muscle) & flexible joints
- Energy level
- Metabolism
- Nutrition intake & removal of toxins

PREVENT:

- Dementia, Alzheimer & Parkinson

Liquid = 98% absorption, easy to take & quick result

ONE-TIME
DISCOUNT **€5**

on the energy exchange when
you order the Golden Duo.

Your vitality impacts the earth's vitality!

The GOLDEN DUO, for young and old, to Vitalize both body & mind

Why Magnesium L-Threonate Forte Brain Power and D-Cal Cell Repair?

Both minerals are PRIMARY, meaning that they determine the optimal functioning of our bodies and the quality of our thought processes. Magnesium is number one and is also called 'the master mineral' because it is responsible for 3,700 enzymatic processes according to the latest scientific findings. The Boron in D-Cal Cell Repair is the second primary mineral and is said to be responsible for almost 300 essential processes. In short, these 2 minerals determine a very large part of your vitality.

Why is 'the Golden Duo' crucial especially in this day and age?

Since the activation of the 5G network, our bodies are now active 24 hours a day to protect our cells from EMF* radiation. As a result of this radiation, our cells get damaged and even die. These damaged and dead cells need to be cleared and removed. New cells must also be created to replace them. This process produces toxins that acidify the blood. To neutralize this acidification, the body takes calcium from bones and magnesium from muscles to bind the resulting acids into acid crystals, keeping the pH of the blood constant to prevent further damage to the body. The pH of our blood is crucial for our survival. The ideal pH of the blood is 7.365. If the pH is 7.2, humans go into coma, if the pH drops below 6.9, it means death!

The result of this "useful survival process" is: weaker bones (decalcification) & painful

joints, hardening of the cell wall (which hinders the absorption of nutrition & removal of toxins and affects our ability to think), which is worsened by us 'drying out' (radiation) and contraction of muscles (to realize that our heart is also a muscle).

Functioning of the Golden Duo:

D-Cal Cell Repair ensures that excess calcium in the cells is returned to the joints and bones to prevent further weakening of the bones (osteoporosis). It also lifts the hardening of the cell wall so that nutrition and toxins are properly exchanged again. Magnesium is needed for this process in cells as an ATP* energy supplier.

Calcification also applies to the pineal gland (our third eye), which plays an important role in the Brain-Blood Barrier (but also provides the connection to our 'higher' consciousness). Due to this calcification toxins are not as they should be stopped, but rather passed through, and these toxins cause damage to our brains. Hence, many people today are forgetful and less able to concentrate.

Magnesium L-Threonate Forte Brain Power is specially developed for the brain and is the only magnesium that helps building brain cells. Together with D-cal Cell repair (both liquid and therefore 98% directly absorbable), they help restore the calcium/magnesium balance. The Golden Duo is exactly what we all need today, to optimize both our thinking capacity and our vitality.

The Golden Duo for young & old, is so popular because it works!

* EMF = Electric Magnetic Fields

* ATP = Adenosine triphosphate

Energy Exchange (EE)

Magnesium L-Threonate Forte € 39,95

D-Cal Cell Repair € 29,95
