Sharing your Forever Vital results with others creates a more vital world and we call it 'the way of sharing'.

Why Forever Vital?

A few years ago, we had a visit from a young doctor. She and her husband (also medically educated) had a conversation about the fact that they no longer knew anyone in their circle of friends who was really Fit & Vital. This observation made us ask the following questions:

- ✦ How does one become Fit & Vital?
- ✦ Why are we not?
- ✦ Why do many remedies work insufficiently?
- ✦ So how to do it?

How do you get Fit & Vital?

If this was so easy to achieve then everyone, young and old, would be Fit & Vital, but apparently this requires more insight into what our body and mind really need. Only how do I know/measure this?

Why aren't we fit and vital?

Our environment has changed a lot in the last 100 years; today's diet is deficient in essential minerals, the air and water is polluted and with the emergence of TV, Computers and Mobile Phones, we are nowadays 24 hours a day exposed to radiation. All these factors & more, cause an accumulation of toxins, body processes stagnate and this undermines our vitality.

Why do many remedies work insufficiently?

Many remedies are in pill form, which means only 18% is absorbed by our body, or they are synthetic, making it for our organic body an addition of a toxin instead of a contribution for our vitality.

So how to do it?

More than 25 years of in-depth knowledge of the human body as an organization and these insights tested and 'measured' in practice, to know for sure 'what works', is summarized in the Forever Vital method, making being Fit & Vital also reachable for you and your loved ones.
