

6. FOR INDIVIDUALS & FAMILIES

I'm already busy. Why should I join?

Americans All 2.0 is designed to make participation simple and voluntary. A free personal membership gives you access to the website and its storytelling features, while the future discount program can provide additional benefits from participating businesses.

Will my \$4 really make a difference?

Yes. The program is designed so that individual participation can generate recurring financial support for participating schools and other nonprofit businesses. When many people participate, small individual contributions can become a meaningful source of ongoing support.

Is this just another funding program?

No. Americans All 2.0 is designed as a community engagement platform, not simply a funding campaign. It combines community participation, storytelling, and a discount program that can generate sustainable financial support for schools and other nonprofit businesses.

What's in it for local businesses?

Participating businesses can connect with local individuals and families, offer discounts and other benefits to members, and build lasting relationships within their communities while supporting schools and other nonprofit businesses.

What happens if only a few families join?

The program is designed to grow through participation. As more individuals, families, nonprofit businesses (including schools), and businesses join, the opportunities increase for everyone involved.

Can this work in large cities as well as small towns?

Yes. Americans All 2.0 is designed as a scalable platform that can connect participants within local communities while allowing the model to expand as participation grows.
